*Forensic Science International*, 49 (1991) 239–241
Elsevier Scientific Publishers Ireland Ltd.

# SUBJECT INDEX
Volume 49 (1991)

Abuscreen®, Emit®, GC/MS, immunoassay, cannabinoid, marijuana, TDx®, THC, 43
amphetamines, GC/MS determination, heptafluorobutyric anhydride derivatization, urine and seized material screening, 205
autopsy, British national, death abroad, 103
autopsy, carbon monoxide poisoning, cyanides, homicide, burns, 179
autoradiographs, DNA, video scanner, kilobase size, 17

basic drugs, extraction, blood, gas chromatography, high pressure liquid chromatography, 33
benzoylecgonine, cocaine, urine drug testing, coca tea, 57
biological materials, rapid method, lidocaine analysis, column extraction, HPLC, 65
blood, basic drugs, extraction, gas chromatography, high pressure liquid chromatography, 33
blunt head trauma, cerebral arterial dissection, stroke, 113
British national, death abroad, autopsy, 103
burns, carbon monoxide poisoning, cyanides, homicide, autopsy, 179
butorphanol, tranylcypromine, monoamine oxidase inhibitor, interaction, 185

cannabinoid, Abuscreen®, Emit®, GC/MS, immunoassay, marijuana, TDx®, THC, 43
carbon monoxide poisoning, cyanides, homicide, burns, autopsy, 179
cause of death, chronic alcoholic, manner of death, 171
cell separation, sex chromatin, dental pulp, mummification, heat effects, 127
cerebral arterial dissection, blunt head trauma, stroke, 113
chronic alcoholic, manner of death, cause of death, 171
cocaine, benzoylecgonine, urine drug testing, coca tea, 57
cocaine, nuclear magnetic resonance, solvents, minor components, estimation, 225
coca tea, cocaine, benzoylecgonine, urine drug testing, 57
column extraction, rapid method, lidocaine analysis, biological materials, HPLC, 65
cyanides, carbon monoxide poisoning, homicide, burns, autopsy, 179

data comparison, DNA, VNTR probe, forensic stain analysis, fragment size determination, 1
death abroad, British national, autopsy, 103
dental pulp, sex chromatin, mummification, cell separation, heat effects, 127
DNA, video scanner, kilobase size, autoradiographs, 17
DNA, VNTR probe, forensic stain analysis, fragment size determination, data comparison, 1
DNA analysis, sex identification, polymerase chain reaction (PCR), 81

Emit®, Abuscreen®, GC/MS, immunoassay, cannabinoid, marijuana, TDx®, THC, 43
estimation, nuclear magnetic resonance, cocaine, solvents, minor components, 225
2-, 3- and 4-ethoxyamphetamine, synthesis, spectra, infrared, ultraviolet, nuclear magnetic resonance, mass, 159
extraction, basic drugs, blood, gas chromatography, high pressure liquid chromatography, 33

fatty tissues, pathology and biology, haptoglobin, non-ionic detergents, 95
forensic stain analysis, DNA, VNTR probe, fragment size determination, data comparison, 1
fragment site calculation, RFLP, VNTR, *Hae*III/pYNH24, 21
fragment size determination, DNA, VNTR probe, forensic stain analysis, data comparison, 1

gas chromatography, basic drugs, extraction, blood, high pressure liquid chromatography, 33
GC/MS, Abuscreen®, Emit®, immunoassay, cannabinoid, marijuana, TDx®, THC, 43
GC/MS determination, amphetamines, heptafluorobutyric anhydride derivatization, urine and seized material screening, 205

*Hae*III/pYNH24, RFLP, fragment site calculation, VNTR, 21
haptoglobin, pathology and biology, non-ionic detergents, fatty tissues, 95
heart, inflammatory pseudotumour, sudden death, 89
heat effects, sex chromatin, dental pulp, mummification, cell separation, 127
heptafluorobutyric anhydride derivatization, amphetamines, GC/MS determination, urine and seized material screening, 205
high pressure liquid chromatography, basic drugs, extraction, blood, gas chromatography, 33
histology, skeletal remains, postmortem interval, ultrastructure, UV-fluorescence, 143
homicide, carbon monoxide poisoning, cyanides, burns, autopsy, 179
HPLC, rapid method, lidocaine analysis, biological materials, column extraction, 65

immunoassay, Abuscreen®, Emit®, GC/MS, cannabinoid, marijuana, TDx®, THC, 43
inflammatory pseudotumour, heart, sudden death, 89
infrared, 2-, 3- and 4-ethoxyamphetamine, synthesis, spectra, ultraviolet, nuclear magnetic resonance, mass, 159
interaction, butorphanol, tranylcypromine, monoamine oxidase inhibitor, 185
intoxication, seizures, trimipramine, sudden death, 75

kilobase size, DNA, video scanner, autoradiographs, 17

lidocaine analysis, rapid method, biological materials, column extraction, HPLC, 65

manner of death, chronic alcoholic, cause of death, 171
marijuana, Abuscreen®, Emit®, GC/MS, immunoassay, cannabinoid, TDx®, THC, 43
mass, 2-, 3- and 4-ethoxyamphetamine, synthesis, spectra, infrared, ultraviolet, nuclear magnetic resonance, 159
methanol, poisoning, toxicology, oral ingestion, vitreous humor, pericardial fluid, 193
methylbenactyzium bromide, thin-layer chromatography, pyrolysis gas chromatography, ODS-cartridge, 197
minor components, nuclear magnetic resonance, cocaine, solvents, estimation, 225
monoamine oxidase inhibitor, butorphanol, tranylcypromine, interaction, 185
mummification, sex chromatin, dental pulp, cell separation, heat effects, 127

non-ionic detergents, pathology and biology, haptoglobin, fatty tissues, 95
nuclear magnetic resonance, 2-, 3- and 4-ethoxyamphetamine, synthesis, spectra, infrared, ultraviolet, mass, 159
nuclear magnetic resonance, cocaine, solvents, minor components, estimation, 225

ODS-cartridge, methylbenactyzium bromide, thin-layer chromatography, pyrolysis gas chromatography, 197
oral ingestion, methanol, poisoning, toxicology, vitreous humor, pericardial fluid, 193

paraquat, poisoning, parenteral administration, suicide, 215
parenteral administration, poisoning, paraquat, suicide, 215
pathology and biology, haptoglobin, non-ionic detergents, fatty tissues, 95
pericardial fluid, methanol, poisoning, toxicology, oral ingestion, vitreous humor, 193
poisoning, methanol, toxicology, oral ingestion, vitreous humor, pericardial fluid, 193
poisoning, paraquat, parenteral administration, suicide, 215
polymerase chain reaction (PCR), sex identification, DNA analysis, 81
postmortem interval, skeletal remains, histology, ultrastructure, UV-fluorescence, 143
pyrolysis gas chromatography, methylbenactyzium bromide, thin-layer chromatography, ODS-cartridge, 197

rapid method, lidocaine analysis, biological materials, column extraction, HPLC, 65
RFLP, fragment site calculation, VNTR, *Hae*III/pYNH24, 21

seizures, trimipramine, intoxication, sudden death, 75
sex chromatin, dental pulp, mummification, cell separation, heat effects, 127
sex identification, DNA analysis, polymerase chain reaction (PCR), 81
skeletal remains, postmortem interval, histology, ultrastructure, UV-fluorescence, 143
solvents, nuclear magnetic resonance, cocaine, minor components, estimation, 225
spectra, 2-, 3- and 4-ethoxyamphetamine, syn-

thesis, infrared, ultraviolet, nuclear magnetic resonance, mass, 159
stroke, blunt head trauma, cerebral arterial dissection, 113
sudden death, heart, inflammatory pseudotumour, 89
sudden death, seizures, trimipramine, intoxication, 75
suicide, poisoning, paraquat, parenteral administration, 215
synthesis, 2-, 3- and 4-ethoxyamphetamine, spectra, infrared, ultraviolet, nuclear magnetic resonance, mass, 159

TDx®, Abuscreen®, Emit®, GC/MS, immunoassay, cannabinoid, marijuana, THC, 43
THC, Abuscreen®, Emit®, GC/MS, immunoassay, cannabinoid, marijuana, TDx®, 43
thin-layer chromatography, methylbenactyzium bromide, pyrolysis gas chromatography, ODS-cartridge, 197
toxicology, methanol, poisoning, oral ingestion, vitreous humor, pericardial fluid, 193
tranylcypromine, butorphanol, monoamine oxidase inhibitor, interaction, 185
trimipramine, seizures, intoxication, sudden death, 75

ultrastructure, skeletal remains, postmortem interval, histology, UV-fluorescence, 143
ultraviolet, 2-, 3- and 4-ethoxyamphetamine, synthesis, spectra, infrared, nuclear magnetic resonance, mass, 159
urine and seized material screening, amphetamines, GC/MS determination, heptafluorobutyric anhydride derivatization, 205
urine drug testing, cocaine, benzoylecgonine, coca tea, 57
UV-fluorescence, skeletal remains, postmortem interval, histology, ultrastructure, 143

video scanner, DNA, kilobase size, autoradiographs, 17
vitreous humor, methanol, poisoning, toxicology, oral ingestion, pericardial fluid, 193
VNTR, RFLP, fragment site calculation, *Hae*III/pYNH24, 21
VNTR probe, DNA, forensic stain analysis, fragment size determination, data comparison, 1
